Mxolisi Khumalo

Technology Associate | WTC Alumni | Mentor | Developer | Team Leader

Johannesburg, Gauteng, South Africa

Summary

I'm a multilingual and technically skilled professional with experience in programming (Python, Java, C#, MIPS Assembly, etc), data analysis, and digital systems. I've worked on projects involving automation, web applications, and content management, applying strong problem-solving and debugging skills.

My background includes tutoring high school to varsity students, mentoring prosperous software development students, supervising and training facilitators of campus/community roles within a software development academy. I thrive in both team and independent settings, bringing a mixture of technical capability, resilience, adaptability, and a continuous learning mindset to every role.

Experience

ActiveOps

Technology Associate

March 2026 - Present (5 months)

Selected onto a structured software delivery training programme under the ActiveOps Youth Employment Service (YES) initiative, building a broad technical foundation across the software development lifecycle before specializing in Development.

- Contributing to the development and maintenance of software features across the WW7 application stack
- Writing clean, readable code in line with team coding standards
- Participating in code reviews and peer knowledge-sharing

WeThinkCode

Campus Role Supervisor

October 2025 - January 2026 (4 months)

Springs, Gauteng, South Africa

Directing the operational allocation and supervision of the student workforce, serving as the primary liaison between the student body and Project Management.

- Workforce Oversight: Supervising a group of students assigned to campus and community roles, ensuring strict adherence to performance expectations and 100% compliance with hourly requirements.
- Training & Development: Designing and facilitating training sessions to equip students with necessary operational skills, fostering a culture of accountability and professionalism.
- Operational Efficiency: Managing complex scheduling and role allocation, utilising digital reporting tools to track attendance, verify hours, and generate performance audits for the Project Coordinator.
- Conflict Resolution: Conducting regular performance check-ins, providing mentorship to optimise student output and escalating critical issues to senior management when necessary.

123tutors

Tutor

June 2023 - September 2024 (1 year 4 months)

City of Cape Town, Western Cape, South Africa

Guided and empowered a diverse cohort of students, from high school to 2nd-year university levels, through complex academic subjects. Engineered a comprehensive, hybrid learning environment that seamlessly blended online and in-person instruction to maximize engagement and comprehension.

Spearheaded the development of bespoke educational resources, including insightful video tutorials and detailed explanatory notes, to demystify challenging concepts. Architected personalised study plans and robust test/exam preparation strategies, directly contributing to enhanced student performance and confidence.

Education

WeThinkCode

National Diploma, Software Development · (September 2024 - December 2025)
